K SERIES

AGI NECO K SERIES

AGI NECO's K Series mixed flow dryer includes everything AGI NECO is known for; high quality grain drying, and up to 30% in fuel savings compared to a conventional screen dryer all at a lower price point! The K Series grain dryer features a basic operating system making it user friendly and the compact size is a great solution for smaller farm operations.

SIMPLE & RELIABLE DRYER CONTROL

- Easy to use touch screen interface
- Dryer setup, alarm, and bushel counter
- Single wet / dry transport relays
- Wet / dry configurable timers
- Alarms are tracked in alarm log
- Single sensor moisture manager system
- High and low moisture limit settings
- Standard gravity fill roof
- Leveling auger available as an option
- Cooling floor available if required
